For Immediate Release:

Are You Providing Your Agents With The Best Real Estate Website To Attract New Listings?

For In today's real estate market, where Internet technology can define you and your brand, successful real estate brokers understand the importance of having a top-notch website to support and facilitate their agents in attracting new listings. If your agency's website is outdated and you're not keeping up with current Internet technologies, what plans do you have to upgrade your site such that your agents will no longer be at a disadvantage when they seek to get new listing contracts?

Important questions to ask yourself are:

- Am I leveraging interactive Google Maps to showcase my agent's listings on a single map?
- Am I enabling my agents to post and manage, through a secure login, their listings, including property details and photos?
- Am I randomly featuring and promoting my agent's listings on my agency's home page?
- Is my website generating excitement and a sense of urgency amongst sellers to sign a listing agreement with my agents?
- Is my website strengthening my agents' client relationships?

If your agency's current site lacks any of these benefits that may be keeping your agents from successfully signing new listing contracts, you should strongly consider the Pro Web Property Manager by Professional Web Designs. It's a cutting edge Internet real estate web site complete with Google mapping and the latest web 2.0 technology offering your prospects and agents a better web experience. To inquire about a hands-on, full-access demo of the Pro Web Property Manager, contact Professional Web Designs at 941-922-3003 or visit www.prowebdesigns.us.

###

Professional Web Designs is a Sarasota, Florida based web marketing firm and the creator of the Pro Web Property Manager. They seek to partner real estate firms with the common goal of marketing their properties.
