For Immediate Release:

## How Do You Select A Web Firm To Partner With?

Think back for a moment to you how you selected your current real estate web site and the person or firm who developed it. What was the deciding factor that led you to this choice? Was it an attractive price; a quality product, the size of the firm, the close proximity to your business or that they designed area sites for your local competition? If you had it to do all over again, would you still make the same decision?

If you're really serious about growing your business online and want to become the envy of your competition, you obviously want to select the best web firm who can provide you with the best product at a reasonable price to accomplish this goal. At a minimum, you'll want a web firm who understands the latest web 2.0 technologies, latest aerial real estate mapping and is well-versed in database programming to design a site that can "scale" and "grow" with your business. You'll also want a firm who can help to automate your business and strengthen client relationships.

If you're currently seeking to improve or update your web presence, consider Professional Web Designs. We can be your technology partner both before and after the successful launch of your new site. We offer the Pro Web Property Manager, a state-of-the-art real estate website complete with Google mapping technology. For more information about our unique product or to view an online demo, contact Professional Web Designs at 941-966-9087 or visit [www.prowebdesigns.us](http://www.prowebdesigns.us). Ask about our hands-on, full-access demo.
